PROFILE

Data science and ML fresher with hands-on experience in Python-based data preprocessing, modeling, and evaluation, seeking an entry-level analytics or applied ML role.

TECHNICAL SKILLS

Programming: Python, SQL | **Data:** Cleaning, EDA, Feature Engineering | **Machine Learning:** Classification, Evaluation Metrics, Class Imbalance | **Deep Learning:** CNN Basics, Image Classification | **Libraries:** Pandas, NumPy, scikit-learn, TensorFlow, OpenCV | **Databases:** PostgreSQL (Supabase), MySQL | **Backend:** FastAPI (basic) | **Tools:** Git, GitHub, VS Code

PROJECTS

Abacus Learning Portal (Deployed)

- Built a web-based learning portal to manage student records and performance data.
- Used Supabase (PostgreSQL) for authentication and structured data storage.
- Designed data models to track student progress and learning activities.

Credit Card Fraud Detection

- Preprocessed transactional data and addressed class imbalance using SMOTE.
- Trained and evaluated classification models on real-world datasets.
- Focused on improving fraud detection performance on minority classes.

Sign Language Translator (Computer Vision)

- Developed a CNN-based image classification system for hand gesture recognition.
- Trained the model using the Sign Language MNIST dataset.
- Integrated OpenCV for real-time webcam-based inference.

EXPERIENCE

Machine Learning Intern – CodSoft (Remote)

May 2025 – June 2025

- Worked on applied machine learning tasks using real-world datasets.
- Built ML pipelines including preprocessing, training, and evaluation.
- Implemented classification and NLP models under mentorship.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

Anurag University, Hyderabad

CGPA: 8.01 | 2023 – Present

ACHIEVEMENTS

- Finalist, College Tech Expo 2024 – CNN-based Sign Language Converter
