CAREER OBJECTIVE

Motivated Artificial Intelligence and Machine Learning student with hands-on experience in Python-based data analysis, machine learning model development, and backend API integration. Seeking opportunities to apply technical skills in real-world projects while building intelligent data-driven systems.

EDUCATION

- **Bachelor of Technology – Artificial Intelligence & Machine Learning** Anurag University, Hyderabad (2023–Present) — CGPA: 8.01
 - **Intermediate, Trividya Junior College (2021–2023)** — Percentage: 94%
 - **Little Flower High School** — CGPA: 10
-

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL
 - **Machine Learning:** Scikit-learn, Pandas, NumPy, TensorFlow, OpenCV
 - **Data Science:** Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Handling Imbalanced Data (SMOTE), Model Evaluation
 - **Backend Development:** FastAPI, Node.js, Express.js, REST APIs
 - **Databases:** PostgreSQL (Supabase), MySQL
 - **Tools:** Git, GitHub, VS Code
-

PROJECTS

- **VizCraft : Intelligent Data Visualization Builder** Developed a full-stack platform that converts structured datasets into interactive visualizations. Implemented backend schema detection and visualization compatibility validation using FastAPI. Built workflows supporting dataset upload, chart configuration, and downloadable visualizations.
 - **Sign Language Translator (Computer Vision)** Developed a CNN-based image classification model to recognize hand gestures using the Sign Language MNIST dataset. Integrated OpenCV for real-time webcam inference and prediction.
 - **Bank Churn Prediction Model – CodSoft Internship** Developed a machine learning model to predict customer churn using demographic and financial features. Performed exploratory data analysis, preprocessing, and feature engineering to improve prediction performance.
-

EXPERIENCE

Machine Learning Intern — CodSoft (Remote)

May 2025 – June 2025

- Worked on applied machine learning projects using real-world datasets.
 - Built ML pipelines including preprocessing, training, and evaluation.
 - Implemented classification models and analytical workflows.
-

ACHIEVEMENTS

- Finalist — College Tech Expo 2024 (CNN-based Sign Language Converter)
 - Solved 100+ coding problems on LeetCode focusing on data structures and algorithms.
-

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy
- Java Programming — Great Learning
- Python — Udemy
- SQL (Basic) — HackerRank
