CAREER OBJECTIVE

B.Tech student in AI & ML with hands-on experience in Machine Learning, Computer Vision, and Full-Stack Development. Built and deployed projects using Python, TensorFlow, OpenCV, FastAPI, and React, solving real-world problems through data-driven AI solutions. Passionate about applying technology to create scalable, impactful systems while continuously expanding expertise in AI and software engineering.

EDUCATION

- Bachelor of Technology in Computer Science Engineering - AI & ML, Anurag University (2023–2027)
CGPA: 8.01
- Intermediate, Trividya Junior College (2021–2023) — Percentage: 94%
- SSC, Little Flower High School — CGPA: 10

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Web Development:** HTML, CSS, Bootstrap, ReactJS, FastAPI, API Integration
- **Databases:** PostgreSQL (Supabase), MySQL
- **Machine Learning:** Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, OpenCV
- **Tools & Operating Systems:** VS Code, Git, GitHub, Jupyter Notebook, Docker
- **Computer Science Fundamentals:** Operating Systems (OS), Computer Networks (CN), Database Management Systems (DBMS), Object-Oriented Programming (OOP), Data Structures and Algorithms
- **Soft Skills:** Teamwork & Collaboration, Adaptability, Critical Thinking, Time Management, Creativity & Innovation

PROJECTS

- **Sign Language Translator (Computer Vision)**
 - Developed a deep learning-based sign language recognition system using the Sign Language MNIST dataset to classify hand gestures representing alphabets.
 - Performed image preprocessing, normalization, augmentation, and feature extraction techniques to improve model robustness and classification accuracy.
 - Designed and trained a Convolutional Neural Network (CNN) using TensorFlow/Keras and evaluated performance using accuracy and confusion matrix metrics.
 - Integrated OpenCV-based webcam input for real-time gesture recognition and prediction, enabling live inference on video streams.**Technologies:** Python, TensorFlow/Keras, OpenCV, NumPy, Pandas, Matplotlib, Flask
- **Drift RAG: Retrieval-Augmented Generation for Dynamic Document QA**
 - Built a retrieval-augmented generation (RAG) pipeline for question answering over large document collections, enabling context-aware responses.
 - Implemented document chunking, embedding generation using sentence-transformers, and FAISS-based vector search for efficient semantic retrieval.
 - Integrated a large language model (LLM) to synthesize answers from retrieved context, improving factual accuracy and reducing hallucinations.
 - Deployed the system as a FastAPI service with a React-based frontend for interactive querying and document management.**Technologies:** Python, LangChain, FAISS, HuggingFace Transformers, FastAPI, React, Docker
- **VizCraft: Intelligent Data Visualization Builder**
 - Developed a full-stack data visualization platform that converts structured datasets into interactive analytical dashboards and visual reports.
 - Implemented backend schema detection, column-type identification, and visualization compatibility validation to automate chart recommendations.
 - Built REST APIs using FastAPI for dataset upload, preprocessing, chart generation, and visualization export functionalities.
 - Designed a responsive React-based frontend enabling users to upload datasets, customize charts, preview visualizations, and download outputs.**Technologies:** Python, FastAPI, React.js, Pandas, NumPy, Plotly, Matplotlib, REST APIs, Git

EXPERIENCE

- Machine Learning Intern — CodSoft (Remote)** May 2025 – June 2025
- Developed and applied machine learning models on real-world datasets
 - Built end-to-end ML pipelines including preprocessing, training, and evaluation
 - Implemented classification models and conducted data analysis to derive insights

CERTIFICATION COURSES

- Cisco — Introduction to Cybersecurity
- Great Learning — Certification in Java
- Udemy — Certification in Python
- Udemy — Certification in Machine Learning
- HackerRank — SQL (Basic)
- Google — Gemini for Google Workspace Certification

ACHIEVEMENTS

- **Second Runner-up — College Tech Expo 2024:** Secured 3rd place among competing teams for developing a CNN-based Sign Language Translation System capable of real-time gesture recognition using Computer Vision.
